

VANDANA BHOYAR

QA Test Engineer | Manual & Automation Testing | 4.5 Years Experience

✉ vandana.s.bhojar1@gmail.com ☎ +91 9975361519 📍 Pune, India 🔗 [linkedin.com/in/Vandana-bhojar-qa](https://www.linkedin.com/in/Vandana-bhojar-qa)

PROFESSIONAL SUMMARY

- 4.5 years of experience in Software Testing, spanning manual and automation testing of web-based applications across hospitality, data backup, banking & finance, fintech, and enterprise software domains.
- Hands-on expertise in UI automation using Playwright (TypeScript/JavaScript) as primary tool and Selenium WebDriver (Java); skilled in building scalable frameworks using Page Object Model (POM) with type-safe TypeScript.
- Proficient in API testing using Postman and REST Assured — validating response codes, headers, payloads, and chaining API calls across RESTful services.
- Experienced in fintech domain testing including payment gateways, KYC/AML workflows, transaction validation, and regulatory compliance scenarios.
- Strong exposure to cloud platforms (AWS & Azure) with understanding of application deployment and environment configuration.
- Solid knowledge of SQL for backend validation, data verification, and writing complex queries for test data setup.
- Experienced in functional, regression, integration, system, smoke, sanity, exploratory, performance, and security testing.
- Proficient in cross-browser and cross-platform testing (Chrome, Firefox, Edge, Safari) and responsive web validation.
- Experienced with CI/CD pipelines using Jenkins, GitHub Actions, and Git for automated test execution and version control.
- Expertise in test case creation, test scenario preparation, RTM preparation, and defect lifecycle management using Jira.
- Strong analytical skills with ability to coordinate across cross-functional teams and client stakeholders in Agile/Scrum environments.

TECHNICAL SKILLS

Testing Types	Functional, Regression, Smoke, Sanity, System, Integration, Exploratory, UAT, Cross-Browser, Performance (Basic), Security (Basic), API Testing
Automation Tools	Playwright (Primary – TypeScript/JS), Selenium WebDriver (Java/JS), Cypress (Basic) — POM, Data-Driven, BDD
API Testing	Postman, REST Assured, Testing, API response validation, Chaining API requests, Status code & payload verification, OAuth 2.0 / JWT Testing
Fintech Skills	Payment Gateway Testing (Razorpay, Stripe), KYC/AML Validation, Transaction Testing, PCI-DSS Awareness, Banking APIs, UPI/NEFT/RTGS Flow Testing
Programming	Java, JavaScript, TypeScript (Page Object Model, type-safe test scripts), Python (Basic)
Frameworks	Page Object Model (POM), Data-Driven Testing, BDD (Cucumber), TestNG, Maven, Pytest (Basic)
CI/CD & DevOps	Jenkins, GitHub Actions, Git, GitHub — automated test execution & version control pipelines, Docker (Basic)
Cloud Platforms	AWS (EC2, S3, Lambda – Basic), Azure (Azure DevOps, Azure Portal, Azure Test Plans)
Database	MS SQL Server, MySQL, PostgreSQL (Basic) – queries, joins, stored procedures, data validation
Security Testing	OWASP Top 10 Awareness, SQL Injection, XSS testing (Basic), HTTPS/SSL Validation
Performance Tools	JMeter (Basic) – Load Testing, Response Time Validation
Test Management	Jira, Zephyr, Confluence, TestRail, Azure Test Plans
Reporting Tools	Jaspersoft, Allure Reports, Extent Reports, HTML Reports
Other Tools	Horizon, MobaXterm, VS Code, Eclipse, Chrome DevTools, Figma (Basic – for UI review)

WORK EXPERIENCE

Test Engineer | Xoriant Solutions Pvt. Ltd., Pune

03-01-2022 – 13-04-2026

► Infor HMS – Hospitality Management System

Role: Test Engineer | Client: Infor | Jan 2025 – April 2026

Cloud-based hotel Property Management System (PMS) enabling hospitality organizations to manage operations. Worked on validating data migration from Cognos to Jaspersoft reporting platform and automation of regression suites.

- Created comprehensive test data to validate reports post-migration from Cognos to Jaspersoft, ensuring data integrity across hundreds of report types.
- Performed functional and regression testing to ensure system accuracy and reliability after migration.
- Verified data consistency and integrity between legacy Cognos reports and new Jaspersoft reports using SQL queries.
- Developed and executed automated UI test scripts using Playwright (TypeScript & JavaScript) following POM framework, increasing automation coverage by 40%.
- Designed and maintained Selenium WebDriver (Java) test scripts for regression suites integrated with Jenkins CI pipelines; refactored legacy scripts to reduce flakiness by 30%.
- Collaborated remotely with client stakeholders to clarify requirements, resolve issues, and present test results.
- Reported and tracked defects in Jira with Zephyr; conducted retesting and regression cycles per sprint.

Tools & Technologies: Playwright, Selenium WebDriver, Jira, Zephyr, Jaspersoft, Confluence, Git

► FinSecure Pay – Digital Payments & Lending Platform

Role: Test Engineer | Client: FinSecure Technologies | Apr 2024 – Dec 2025

A fintech platform providing digital payment processing, personal lending, and KYC/AML compliance services for banking and NBFC clients.

- Designed and executed end-to-end test cases for payment gateway integrations (Razorpay, Stripe) covering success, failure, timeout, and refund scenarios.
- Validated KYC/AML workflows including document verification, identity checks, and compliance rule triggers across multiple user personas.
- Performed API testing of RESTful banking APIs and UPI/NEFT/RTGS transaction flows using Postman and REST Assured; validated JWT-based OAuth 2.0 authentication.
- Built Playwright (TypeScript) automation scripts for regression testing of customer-facing web portal; achieved 50% automation coverage within first sprint cycle.
- Conducted database validation using SQL queries to verify transaction records, audit logs, and account balance integrity post-payment processing.
- Performed security testing scenarios including input validation, SQL injection checks, and HTTPS/SSL certificate validation as per OWASP guidelines.
- Tested loan disbursement and EMI calculation modules for correctness across edge-case inputs, boundary conditions, and concurrent user scenarios.
- Worked closely with business analysts and developers to clarify regulatory compliance requirements and document acceptance criteria.

Tools & Technologies: Playwright, REST Assured, Postman, SQL Server, Jira, Zephyr, Git, Jenkins, Azure DevOps

► Veritas NetBackup – Enterprise Data Protection

Role: Test Engineer | Client: Veritas | Jun 2022 – Apr 2024

Enterprise-grade data protection solution supporting file system backup, catalog backup, VM backup, and recovery across Windows, UNIX, and Linux platforms.

- Executed smoke, sanity, functional, and system testing on NetBackup modules; validated core backup and restore operations end-to-end.
- Built and maintained Selenium WebDriver (Java) automation framework from the ground up for regression testing of web console modules; integrated test suite with Jenkins for nightly CI runs, reducing manual regression effort by 50%.
- Tested Kubernetes cluster configurations to ensure custom nodes were correctly set up and integrated with the application.

- Validated Elastic Media functionality to confirm dynamic scaling based on user demand.
- Verified backup and restore operations across multiple platforms: Windows, UNIX, and Linux.
- Conducted cloud-based environment testing on AWS (EC2, S3) and Azure platforms.

Tools & Technologies: Selenium WebDriver, Playwright, Jenkins, Git, AWS, Azure, Linux, Jira, Confluence, Horizon, MobaXterm

CERTIFICATIONS & ACHIEVEMENTS

- **ISTQB Foundation Level V4.0 – Certified**
- **Microsoft Azure AI Fundamentals (AI-900) – Certified**
- Manual & Automation Testing – Online Training
- Java Programming – Online Training
- Achievement: Received E-Cards from Business Users for outstanding performance and client satisfaction

EDUCATION

Bachelor of Engineering (Electronics)

RGCE, Chandrapur | Gondwana University | 2019
